Why DragonPoint?

Database application specialists: DragonPoint follows industry best practices to design and develop applications that separate user interface, business logic, and data access layers for ease of maintenance, extensibility, and reuse.

Project management expertise: Our proven project management practices and structured software development methodology keep projects on time and in budget.

Human Communication: Being available when you need us and keeping you informed are high priorities at DragonPoint. With email, cell phone, Skype, Instant Messenger, web conferencing, and written weekly status updates, we're always available and want you to know where we are with your project.

Experienced Team: DragonPoint's team members are US citizens and permanent employees who have 125+ years combined experience using database and design tools such as Microsoft Visual Studio .NET (C#, VB.NET, ASP.NET) and SQL Server.

Proven solutions

A sample of the applications DragonPoint has developed and supports include:

- PDA system tracks 60,000+ members with automatic transfer to a back office database for validation of membership privileges.
- Project tracking system reduced time to manage active projects from 20 hours per day to six hours or less.
- Desktop application replaced manual process of sourcing parts and increased sales by 50% with real-time searches of internal databases and external web sources and immediate consolidated presentation of results.
- PDA application reduced inventory errors by 90%.
- Manufacturing quality control system integrated with laboratory equipment to achieve higher quality information and an 80% reduction in staff time.

Customers

DragonPoint's customers include Harris Corporation, Mercedes Homes, Economic Development Commission of Florida's Space Coast, The Villages, Hydro Aluminum, and The Father's Table.

When you need software that works,
DragonPoint delivers.
